

THE MEMORANDA

VOLUME 3, ISSUE 1

Marquis Heating's Quarterly Newsletter

**Marquis
Heating, Inc**

Special Points of Interest:

- *Annual Tune-up*
- *Federal Energy Tax Credit to end at the end of year*
- *Winter's Coming—Please keep pathway clear*
- *Natural Gas Conversions –back page*
- *Propane? No Problem—back page*

HERE COMES OLD MAN WINTER

Clear Path to fill

With winter coming, the snow will follow. Please make sure that there is a clear path to your oil fill pipe and/or your propane tank. Our drivers are told not to deliver to any accounts that doesn't have a clear path for them. We value our employees and we wouldn't want them to get hurt because they didn't know what was under the snow or they have to climb over and around object that are in there way.

LIHEAP Dealer

We are a LIHEAP dealer accepting new customers for #2 Fuel Oil, Kerosene, and Propane accounts.

Federal Energy Tax Credit

The Federal Energy Tax Credit is available on a variety of different propane or natural gas equipment. For those who are looking to upgrade their heating system and/or an on demand water heater, or purchase a wood or pellet stove, check with us to see what tax credits might be available. Please give our office a call to discuss what is available.

Annual Tune-Up

With the winter heating season beginning, many of us are now just looking at our heating systems and realize that we should of looked at it sooner. Now is the time to have your annual tune-up done on your heating system if it hasn't been done. Do you realize that as little as 1/8" of soot on a heat exchanger can increase your fuel consumption by 8%. On average a consumer can save anywhere from 3% to 10% by having an annual tune-up done on their furnace or boiler. When you look at your total fuel consumption you could pay for your annual tune-up and keep money in your pockets from the additional savings.

Pellets

Currently we stock Maine Wood Pellets at both locations. Our pellets are kept under cover and we can load them with one of our fork trucks. Maine Wood Pellets has changed their blend to a 65/35 hardwood/softwood blend. They have provided us with the latest pellet test results which is done by the University of Maine and we can provide a copy to anyone that wants it.

Refer A Friend

Would you like to earn \$25.00 credit on your fuel account, receive a \$25.00 credit for any referrals that sign-up for automatic delivery with us

Marquis Heating offers barbecue tank fill-up at both locations.

Monday—Friday.

Only \$11.00 for a 20lb tank.

Visit one of our convenient locations today.

CARBON MONOXIDE (CO) DETECTORS

- Detectors can be wired into the electrical system of the property or battery operated
- They can be purchased locally
- All types of fuel burning heating systems and diesel exhaust pose a CO risk.

Areas of use

1. Buildings where people sleep
 2. When using a temporary space heating equipment for areas such as basements
 3. Review installation instructions for proper placement
- Maintaining heating systems can prevent CO from becoming a problem.
 - The normal safe exhaust of heating systems from a building allows the CO to vent with other gases with no problems created for people

Natural Gas Conversions

Many people are looking to change from oil to natural gas. We are a current vendor with Bangor Natural Gas and we work hand in hand with them to make the switch to natural gas hassle free. Many natural gas appliances qualify for a Federal Energy tax credit.

Propane? No Problem

We are a full service propane dealer with automatic deliveries and service department to take care of all of our customers needs . We carry a full line of propane burning equipment such as Regency, Hampton, Empire, Napoleon, Miller and etc. If you don't see it in one of our showrooms, just ask as we also have many lines which we can order but don't keep in stock. Got a camp, we stock gas lights and accessories. Whatever your needs please don't hesitate to stop by or give us a call.

Install a new boiler and get 50 gals of free oil

Even though winter is upon us, we can still upgrade your present heating system with a new high efficiency boiler. Most replacements take only a day to install. With the fuel prices being what they are, your new system could pay for itself in just a few years. We offer full sales and installation of new systems as well as service on your existing system. We have 24 hour 7 day a week emergency service department to meet your after hour needs.

Back-up Plan

It is always nice to have a backup plan

Propane — A Smart Choice

Propane can provide for an excellent backup plan as many propane appliances will run when the power is out. Propane is a clean, reliable fuel, and would make a great back-up to your oil heat system. We have many types of fireplaces and stoves which would make a great addition to your family room. Propane is much easier to regulate than wood and is also safer in many ways. For more information on any of the propane appliances that you could have installed, please call one of our two convenient locations.
